+91 7084401314 | shivashishprajapati4@gmail.com | [linkedin.com/in/shivashishp](https://www.linkedin.com/in/shivashishp) | github.com/Shiva-netizen | Noida, India

PROFESSIONAL SUMMARY

Results-driven AI Engineer and Reporting Analyst with hands-on experience in Python, SQL, generative AI, LLM integration, and backend development. Skilled in building AI-powered automation solutions using Microsoft Copilot Studio, Power Automate, Django, and REST APIs. Proficient in machine learning fundamentals, data processing (Pandas/NumPy), prompt engineering, and agentic AI workflows. Experienced in healthcare analytics and cross-functional collaboration. Actively developing expertise in LangChain, RAG pipelines, and vector databases to build production-ready intelligent systems.

TECHNICAL SKILLS

Languages & Core: Python, SQL, JavaScript, C

AI / ML / GenAI: Machine Learning, Generative AI, LLMs, Prompt Engineering, Agentic AI, NLP, LangChain (learning), RAG (learning)

AI Platforms: Microsoft Copilot Studio, Power Automate

Data & Analytics: Pandas, NumPy, Matplotlib, Power BI, Excel (Advanced, Pivot Tables)

Backend & APIs: Django, Flask, REST APIs, Backend Development

Databases & Tools: MySQL, MongoDB, Git, GitHub, Agile/SDLC, OOP, DBMS

Cloud (Familiar): Azure (Power Platform), AWS/GCP (learning), Docker (learning)

PROFESSIONAL EXPERIENCE

Reporting Analyst – AI & Automation — EXL | Noida

Dec 2023 – Present

- Deploy AI-powered automation solutions using Microsoft Copilot Studio and Power Automate to optimize healthcare customer service workflows.
- Apply generative AI and LLM integration techniques to build intelligent agents; implement prompt engineering strategies to improve AI model accuracy.
- Analyze large healthcare datasets with Python and SQL to extract actionable insights; design REST API integrations and backend data pipelines for AI workflows.
- Collaborate cross-functionally with product and engineering teams to translate business requirements into AI/ML solutions.

Python Full Stack Developer – Intern — Apponix Technologies | Bengaluru

Aug – Dec 2023

- Developed 5+ data-driven web apps (Django/Flask) serving 500+ users; integrated 10+ REST APIs improving synchronization efficiency by 35%.
- Optimized SQL databases via indexing and query tuning, reducing execution time by 40%; managed 20+ weekly Git commits under Agile/SDLC methodology.

PROJECTS

Music Bot – AI Chatbot Song Recommender | Python, React, IBM Tone Analyzer API, Last.fm API

- Full-stack AI chatbot recommending songs via real-time NLP emotion analysis — demonstrating end-to-end LLM-adjacent API pipeline design with multiple AI integrations.

Billing Software | Python, Tkinter, MySQL | github.com/Shiva-netizen/BILLING-SOFTWARE-using-PYTHON

- Desktop billing app with MySQL backend; applied SQL optimization and DBMS best practices for concurrent transaction management.

Chess AI Engine | Python | github.com/Shiva-netizen/CHESS-GAME-IN-PYTHON

- Human-vs-computer chess with 3 AI difficulty levels and 5 puzzles — showcasing algorithmic problem-solving and decision-tree logic.

Netflix Clone – Frontend UI | HTML, CSS, Git

- Replicated Netflix UI demonstrating frontend proficiency, responsive design, and version-control discipline.

EDUCATION

B.Tech – Computer Science & Engineering — Pranveer Singh Institute of Technology, Kanpur 2019 – 2023 | 70.02%

Intermediate (Class XII) — National Inter College, Chandauli

2019 | 65.2%

Matriculation (Class X) — Jai Bajarang Inter College, Chandauli

2017 | 74%

CERTIFICATIONS

- Deloitte Australia – Data Analytics Job Simulation | Walmart USA – Advanced Software Engineering Job Simulation
- Problem Solving (Basic), Python (Basic), SQL (Basic) – HackerRank | Juspay Hiring Challenge 2022 | Jumpstart

ACHIEVEMENTS

- Top SQL 50 Badge on LeetCode; 80+ LeetCode problems solved; 300+ problems solved across LeetCode, GeeksforGeeks, Code Studio, and HackerRank.
- 5-Star HackerRank rating in SQL, Python, and Problem Solving; 3-Star in C.
